“HPV and Cervical Cancer: A Model for Cancer Prevention”

Wednesday, February 6, 2019
12:00 - 1:00 p.m.
Taylor Avenue Building (600 S. Taylor Ave.)
2nd floor, Doll and Hill

Michelle Silver, PhD, ScM
Cancer Prevention Fellow
Health Systems and Interventions Research Branch
Division of Cancer Control and Population Sciences
National Cancer Institute

Dr. Silver focuses on cancer prevention, conducting research to increase implementation of evidence-based practices through guideline development, communication, implementation and adherence. Her presentation will focus on human papillomavirus (HPV) and cervical cancer prevention. She will highlight patterns of screening and vaccination in an era of rapidly changing guidelines for cervical cancer prevention, screening, and management.
